ROHAN KUMAR

Full Stack Developer

Gwalior, Madhya Pradesh, India | +91 9340467517 | rohankumar17645@gmail.com | linkedin.com/in/rohan2519y | github.com/Rohan2519Y | rohankumarportfolio.vercel.app

PROFESSIONAL SUMMARY

Full Stack Developer with 1.5+ years of experience designing and building complete web and mobile applications end-to-end — from responsive React/Next.js frontends to Node.js/Express backends, relational and NoSQL data models, and production deployment. Comfortable owning a feature from database schema through API design to User Interface (UI), including authentication, real-time data streaming, performance optimization, and infrastructure-level concerns like rate limiting and concurrency control. Experienced across React.js, Next.js, TypeScript, React Native, Node.js, Express.js, MySQL, and MongoDB, with a strong focus on scalable architecture, clean code, and measurable performance gains.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Redux, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap

Backend: Node.js, Express.js, RESTful API Development, JSON Web Token (JWT) Authentication, MVC Architecture, Server-Sent Events (SSE), Rate Limiting & Middleware Design

Mobile: React Native (Android & iOS)

Databases: MySQL, MongoDB — schema design, query optimization

Tools & Platforms: Git, GitHub, Postman, VS Code, Vercel, Render, Aiven, Android Studio

Core Concepts: CRUD Operations, API Integration, Agile Methodology, Performance Optimization, Scalable Architecture, Concurrency Control

WORK EXPERIENCE

Full Stack Developer — Numeric Infosystem Pvt Ltd *Oct 2025 – Present*

- Design and develop scalable full-stack web applications serving 100+ active users, including a full Employee & HR Management System with role-based Admin and Employee panels, custom MySQL schema, and REST API layer.
- Build an employee attendance web and mobile app (check-in/check-out, working-hours calculation, late tracking, monthly summaries) end-to-end across frontend, backend, and database, reducing manual attendance processing time by 50%.
- Develop resume management and advanced resume-search functionality with multi-filter search, status tracking, and Excel export, cutting recruiter screening time by 40%.
- Implement AI-based resume autofill that automatically extracts candidate details from uploaded resumes, reducing manual data entry by 70%.
- Build interactive report dashboards for attendance, leave, payroll, and recruitment insights, backed by custom SQL aggregation queries, and integrate secure JSON Web Token (JWT) authentication with third-party APIs (Google, SMS, Gmail).
- Collaborate cross-functionally with design and backend teams to deliver features on schedule.

Software Development Intern — PS Softech *Jan 2025 – Sep 2025*

- Developed and maintained 100+ front-end modules using React.js and Material UI, improving component reusability across the codebase.
- Collaborated with backend developers on Node.js API design and integration, validating and testing 120+ endpoints using Postman.
- Identified and resolved 180+ bugs during feature implementation and performance-optimization cycles across the full stack.
- Contributed to mobile app feature development using React Native, supporting delivery of 10 releases.

PROJECTS

JobSpiders — Full Stack Job Portal Application | *jobspiders.com*

- Developed and deployed a full-stack job portal using React.js, Node.js, and Express.js, supporting 10,000+ registered users.

- Implemented RESTful APIs, CRUD operations, and secure JSON Web Token (JWT) authentication for candidate account and profile management.
- Built advanced job filtering and search functionality, improving job-discovery relevance for candidates.
- Designed a candidate dashboard for job tracking, application status, and profile management; optimized API response time by 40%.

Telegram Cloud Storage — Full Stack Cloud Storage Platform | *telegramcloudstorage.vercel.app*

- Architected and built a full-stack cloud storage application using Node.js, Express.js, MySQL, TypeScript, and @mtcute/node, using Telegram's infrastructure to provide free, unlimited-scale file storage.
- Migrated the backend from GramJS to @mtcute/node to enable true streaming uploads/downloads instead of buffering full files in memory, significantly improving performance for large-file transfers.
- Engineered real-time upload progress tracking using Server-Sent Events (SSE), with support for mid-transfer upload cancellation.
- Designed and implemented a custom rate limiter and concurrency-limiter middleware to control API load, prevent abuse, and keep the app stable under concurrent uploads.
- Built channel synchronization, drag-and-drop uploads, inline rename, and a mobile-responsive User Interface (UI) (custom hamburger menu via React portal).
- Deployed and hosted the full application independently; documented the architecture and build process in a portfolio case study.

SalesBuddy | *github.com/Rohan2519Y/Sales-Buddy*

- Built a full-stack marketplace application using React.js, Node.js, and Express.js with integrated payment gateway support.
- Implemented secure RESTful authentication and role-based access, improving user session security.
- Delivered a fully responsive User Interface (UI), improving usability and engagement across mobile and desktop.

Electronics App | *github.com/Rohan2519Y/electronicsapp*

- Built a cross-platform e-commerce app using React Native, Node.js, and Express.js.
- Implemented Async Storage, secure authentication, and third-party payment/API integrations for a seamless checkout flow.

EDUCATION

Bachelor of Computer Applications (BCA) — ITM University, Gwalior **2025–2028 (Pursuing)**

Class 12th (CBSE) — Amar Public School — 75%

Class 10th (CBSE) — Ramkrishna Mission — 75%

ACHIEVEMENTS

- Selected as a participant in Smart India Hackathon, a national-level government innovation competition.
- Secured 3rd Place in the Inter-College Coding Competition, demonstrating strong problem-solving and programming skills.

CERTIFICATIONS

- Full Stack Web Development Certificate — (PS Softech, 2025)
- React (Basic, Intermediate) Certificate — HackerRank, 2025
